"Number of shares issued and outstanding", "Number of shares of treasury stock" and "Average number of shares outstanding" are calculated on the assumption that stock split was implemented at the beginning of the previous fiscal year.

2. The number of shares of treasury stock includes the Company's shares held by "Executive compensation Board Incentive Plan (BIP) trust" and "share-delivering Employee Stock Ownership Plan (ESOP) trust". (1,386,586 shares as of December 31, 2023, 1,502,637 shares as of March 31, 2023)

In addition, these Company's shares are included in the treasury stock which is deducted in calculating the average number of shares.

* Status of implementation of quarterly review procedures

This Summary of Consolidated Financial Results is outside the scope of external auditor's quarterly review procedures under the Financial Instruments and Exchange Act.

* Explanation of the appropriate use of financial forecast:

The financial forecasts and estimates in this Summary of Consolidated Financial Results are based on information available to the Company at the time of report issuance and certain assumptions judged to be reasonable by the Company, and therefore are not guarantees of future performance. Consequently, actual results may differ substantially from those described in this Summary of Consolidated Financial Results. Please refer to "1. Qualitative Information on Financial Results for the Current Quarter (4) Description of Financial Estimates Information such as Consolidated Financial Forecasts" on page 5.

The Company plans to hold an online conference for investors and analysts on February 9, 2024.

Supplementary materials to be used at the conference will be posted on the Company's website.

1. Qualitative Information on Financial Results for the Current Quarter

(1) Description of Operating Results

With respect to the global economy during the first three quarters of the current fiscal year, surges in raw material and energy prices have moderated, while various goods prices have continued to rise when compared to the previous fiscal year. In addition, while policy interest rate hikes, mainly in Europe and the United States, have slowed the yen depreciation levels continued.

In the electronics industry, where the Tokyo Electron (TEL) Group operates, the imbalance between semiconductor supply and demand has improved during the first three quarters of the current fiscal year, driven by semiconductor manufacturers adjusting their inventories by curtailing production from the second half of the previous fiscal year due to the decline in the demand for final products such as PCs and smartphones.

Consequently, capital investment in semiconductor production equipment, which was entering an adjustment phase, showed signs of bottoming out during the first three quarters of the current fiscal year. Although capital investment in semiconductors meant for memory and cutting-edge logic/foundry has generally been on the decline, inquiries about advanced package equipment for generative AI applications are increasing. In addition, capital investment in China, which aims to improve their semiconductor self-sufficiency rate, for the mature generations of semiconductors used for IoT, automotive, and industrial applications, continued their strong growth trend from the previous fiscal year. Considering the transition to a data society and efforts toward realizing a decarbonized society stemming from the expansion of information and communication technology, the role of semiconductors in supporting electronic devices and the importance of their technological innovation is increasing. Therefore, further growth is expected in the semiconductor production equipment market in the medium- to long-term.

As a result, the consolidated financial results (cumulative) for the third quarter of the current fiscal year were net sales of 1,283,234 million yen (year-on-year decrease of 22.3%), operating income of 311,038 million yen (year-on-year decrease of 33.1%), ordinary income of 315,964 million yen (year-on-year decrease of 32.8%), and net income attributable to owners of parent of 239,024 million yen (year-on-year decrease of 32.3%).

From the first quarter of the current fiscal year, information by segment has been omitted, due to the change of the reportable segments to a single segment of "Semiconductor Production Equipment". For details, please refer to "Notes" on page 10 for further information.

(2) Description of Financial Conditions

Current assets at the end of the third quarter of the current fiscal year were 1,537,522 million yen, a decrease of 203,437 million yen compared to the end of the previous fiscal year. This was mainly due to a decrease of 130,858 million yen in cash and deposits, and a decrease of 129,830 million yen in notes and accounts receivable - trade, and contract assets.

Property, plant and equipment increased by 58,640 million yen from the end of the previous fiscal year, to 317,729 million yen.

Intangible assets increased by 1,487 million yen from the end of the previous fiscal year, to 30,046 million yen.

Investments and other assets increased by 49,129 million yen from the end of the previous fiscal year, to 332,115 million yen.

As a result, total assets decreased by 94,180 million yen from the end of the previous fiscal year, to 2,217,413 million yen.

Current liabilities decreased by 72,886 million yen from the end of the previous fiscal year, to 557,006 million yen. This was largely due to a decrease of 32,028 million yen in trade notes and accounts payable, and a decrease of 30,720 million yen in income taxes payable.

Long-term liabilities increased by 611 million yen from the end of the previous fiscal year, to 82,787 million yen.

Net assets decreased by 21,905 million yen from the end of the previous fiscal year, to 1,577,619 million yen. This was largely due to a decrease resulting from the payment of 202,457 million yen in year-end dividends for the previous fiscal year, and interim dividends for the current fiscal year, a decrease resulting from the purchase of treasury stock

of 120,028 million yen, an increase of 239,024 million yen resulting from recording net income attributable to owners of parent, an increase of 40,332 million yen in net unrealized gains on investment securities, and an increase of 16,495 million yen in foreign currency translation adjustments. As a result, the equity ratio was 70.5%.

(3) Description of Cash Flows

Cash and cash equivalents at the end of the third quarter of the current fiscal year decreased by 130,985 million yen compared to the end of the previous fiscal year, to 341,486 million yen. The combined balance including 10,917 million yen in time deposits and short-term investments with maturities of more than three months that are not included in cash and cash equivalents was 352,403 million yen, a decrease of 120,697 million yen from the end of the previous fiscal year. The overall situation regarding cash flows during the third quarter of the current fiscal year was as described below.

Cash flows from operating activities were positive 295,669 million yen, a decrease of 20,954 million yen compared to the same period of the previous fiscal year. The major positive factors were 315,579 million yen in income before income taxes, a 137,069 million yen decrease in notes and accounts receivable - trade, and contract assets, and a 91,176 million yen decrease in prepaid consumption tax. The major negative factors were 118,456 million yen increase in inventories, and a 115,468 million yen in payment of income taxes.

Cash flows from investing activities were negative 104,804 million yen compared to negative 33,709 million yen in the same period of the previous fiscal year. This was largely due to the payment of 87,276 million yen for the purchase of property, plant and equipment.

Cash flows from financing activities were negative 324,358 million yen compared to negative 255,963 million yen in the same period of the previous fiscal year. This was largely due to the payment of 202,457 million yen in dividends, and the payment of 120,028 million yen for the purchase of treasury stock.

Net Income Attributable to Owners of Parent	340.0	(27.9)%	307.0

Note: Percentages indicate changes from the same period of the previous fiscal year.

Note: The financial forecasts and estimates stated in this Summary of Consolidated Financial Results are based on certain assumptions judged to be reasonable by the Company in light of information currently available concerning economic conditions in Japan and overseas, fluctuations in foreign exchange rates, and other factors that may have an impact on performance. The Company does not promise that the forecasts or estimates will be accurate.

They are therefore susceptible to the impact of many uncertainties, including market conditions, competition, the launching of new products (and their success or failure), and global conditions in the semiconductor related industry. Consequently, actual sales and profits may differ substantially from the projections described in this Summary of Consolidated Financial Results.

Notes

Going concern: None

Significant changes in Shareholders' Equity: Yes

The Company executed the purchase of treasury stock based on the resolution of its Board of Directors dated May 11, 2023. Mainly due to this purchase, the amount of treasury stock increased by 114,288 million yen for the nine months ended December 31, 2023, and resulted in 136,322 million yen as of December 31, 2023.

Changes in significant subsidiaries during the period: None

Adoption of special accounting methods for preparation of quarterly financial statements: Yes

The Company and part of its consolidated subsidiaries calculate tax expenses by reasonably estimating the annual effective tax rate on income before income taxes after the application of tax effect accounting for the fiscal year, and applying this rate to income before income taxes for the current quarter under review.

Changes in accounting policies, changes in accounting estimates and restatements: None

Segment information

Nine months ended December 31, 2023 (April 1, 2023 to December 31, 2023)

The description of this section has been omitted as TEL Group has a single segment of semiconductor production equipment (SPE).

Changes in reportable segments

While reportable segments of TEL Group were previously classified into SPE and flat panel display (FPD) production equipment, those segments have been changed into a single segment of SPE from the first quarter of the current fiscal year.

This change is due to the judgement that, based on facts that the impact from the FPD production equipment business has become insignificant while SPE market has made steady growth and is expected to grow higher in future and TEL Group implemented a corporate reorganization that combined the FPD production equipment business into the SPE business from April, 2023 for the purpose of efficient resource utilization, disclosing them as a single segment of SPE will more appropriately reflect the management condition of TEL Group from the viewpoint of the business development and the decision-making process for allocating management resources of TEL Group.

As a result of this change, the description of segment information for the nine months ended December 31, 2023 has been omitted.
