1. Qualitative Information on Financial Results for the Current Quarter

(1) Description of Operating Results

While there has been a slowdown in economic growth in China, the global economy including the U.S. has been robust during the first three quarters of the current fiscal year.

In the electronics industry, where the Tokyo Electron (TEL) Group operates, the rate at which semiconductor shipments has been increasing is decelerating due to adjustments in data center investments and demand for smartphones. However, TEL believes developments in new technologies such as artificial intelligence (AI) and the next-generation telecommunication standards are expected to lead to a medium to long-term upward trend in demand for semiconductors. Under these circumstances, the consolidated financial results (cumulative) for the first three quarters of the current fiscal year were net sales of 959,204 million yen (year-on-year growth of 23.8%), operating income of 234,154 million yen (year-on-year growth of 29.1%), ordinary income of 241,907 million yen (year-on-year growth of 34.1%) and net income attributable to owners of parent of 184,126 million yen (year-on-year growth of 40.1%).

The overview of each business segment is as described below.

(i) Semiconductor Production Equipment

Against the backdrop of the slowdown in demand for data centers and smartphones, some of the memory manufacturers are reviewing their capital investment plans, and the semiconductor manufacturing equipment industry has now entered a period of adjustment. However, net sales to external customers in this segment for the first three quarters of the current fiscal year were 877,982 million yen (year-on-year growth of 20.4%).

(ii) Flat Panel Display (FPD) Production Equipment

The FPD production equipment market was robust, with continued capital investment for small to medium-sized OLED panels for smartphones in addition to capital investment for large-sized LCD panels for televisions in China. Consequently, net sales to external customers in this segment for the first three quarters of the current fiscal year were 81,066 million yen (year-on-year growth of 79.0%).

(iii) Other

Net sales to external customers in this segment for the first three quarters of the current fiscal year were 154 million yen (year-on-year decrease of 49.4%).

(2) Description of Financial Conditions**(i) Financial Conditions**

Current assets at the end of the third quarter of the current fiscal year were 909,708 million yen, a decrease of 36,888 million yen compared to the end of the previous fiscal year. This was mainly due to a decrease of 69,500 million yen in short-term investments included in securities, a decrease of 19,208 million yen in prepaid consumption tax, a decrease of 14,811 million yen in trade notes and accounts receivable, an increase of 36,806 million yen in cash and deposits, and an increase of 24,222 million yen in inventories.

Tangible fixed assets increased by 16,289 million yen from the end of the previous fiscal year, to 142,242 million yen. Intangible fixed assets decreased by 5,933 million yen from the end of the previous fiscal year, to 9,948 million yen. Investments and other assets decreased by 4,817 million yen from the end of the previous fiscal year, to 109,547 million yen.

As a result, total assets decreased by 31,349 million yen from the end of the previous fiscal year, to 1,171,447 million yen.

Current liabilities decreased by 83,142 million yen from the end of the previous fiscal year, to 285,310 million yen. This was largely due to a decrease of 48,546 million yen in income taxes payable, a decrease of 18,963 million yen in trade notes and accounts payable, and a decrease of 15,188 million yen in accrued employees' bonuses.

Long-term liabilities increased by 1,396 million yen from the end of the previous fiscal year, to 64,230 million yen.

Net assets increased by 50,396 million yen from the end of the previous fiscal year, to 821,906 million yen. This was largely due to an increase stemming from 184,126 million yen in net income attributable to owners of parent and a decrease resulting from the payment of 124,754 million yen in year-end dividends for the previous fiscal year and interim dividends for the current fiscal year. As a result, the equity ratio was 69.5%.

The above comparisons to the previous fiscal year are made on the condition that "Partial Amendments to Accounting Standard for Tax Effect Accounting" (ASBJ Statement No. 28, February 16, 2018) was adopted from the beginning of the first quarter of this fiscal year, and such amendments was also retrospectively applied to the balances as of the end of previous fiscal year.

(ii) Cash Flows

Cash and cash equivalents at the end of the third quarter of the current fiscal year decreased by 89,193 million yen compared to the end of the previous fiscal year, to 168,684 million yen. The combined balance including 172,500 million yen in time deposits and short-term investments with maturities of more than three months that are not included in cash and cash equivalents was 341,184 million yen, a decrease of 32,693 million yen from the end of the previous fiscal year. The overall situation regarding cash flows during the first three quarters of the current fiscal year was as described below.

Cash flows from operating activities were positive 124,509 million yen, an increase of 26,100 million yen compared to the same period of the previous fiscal year. The major positive factors were 241,700 million yen in income before income taxes, a 19,190 million yen decrease in prepaid consumption tax, 16,983 million yen in depreciation and amortization, and a 13,586 million yen decrease in trade notes and accounts receivable. The major negative factors were 102,915 million yen in payment of income taxes, a 28,083 million yen increase in inventories, a 17,860 million yen decrease in trade notes and accounts payable, and 15,020 million yen decrease in accrued employees' bonuses. Cash flows from investing activities were negative 82,045 million yen compared to positive 40,986 million yen in the same period of the previous fiscal year. This was largely due to the payment of 56,500 million yen for an increase in time deposits and short-term investments and the payment of 32,914 million yen for the purchase of fixed assets.

Cash flows from financing activities were a negative 129,760 million yen compared to a negative 82,544 million yen in the same period of the previous fiscal year. This was largely due to the payment of 124,754 million yen in dividends.

(3) Description of Financial Estimates Information such as Consolidated Financial Forecasts

There are no changes in the consolidated financial forecast for the fiscal year ending March 31, 2019 from the forecasts released at the time of the previous announcement on October 31, 2018.

Note: The financial forecasts and estimates stated in this announcement are based on certain assumptions judged to be reasonable by the Company in light of information currently available concerning economic conditions in Japan and overseas, fluctuations in foreign exchange rates, and other factors that may have an impact on performance. The company does not promise that the forecasts or estimates will be accurate.

They are therefore susceptible to the impact of many uncertainties, including market conditions, competition, the launching of new products (and their success or failure), and global conditions in the semiconductor related industry. Consequently, actual sales and profits may differ substantially from the projections stated in this announcement.

Notes

Going concern: None

Significant changes in Shareholders' Equity: None

Changes in significant subsidiaries during the period: None

Adoption of special accounting methods for preparation of quarterly financial statements: Yes

The company and a part of its consolidated subsidiaries calculate tax expenses by reasonably estimating the annual effective tax rate on income before income taxes after the application of tax effect accounting for the fiscal year, and applying this rate to income before income taxes for the current quarter under review.

Changes in accounting policies, changes in accounting estimates and restatements: None

Additional information

"Partial Amendments to Accounting Standard for Tax Effect Accounting" (ASBJ Statement No. 28, February 16, 2018) was adopted from the beginning of the first quarter of this fiscal year. As a result, deferred tax assets are classified as "Investments and other assets" and deferred tax liabilities are classified as "Long term liabilities" respectively.

Note on Consolidated Statements of Income

Income taxes

Current income tax expense for the nine months ended December 31, 2018 includes net of 647 million yen of estimated tax benefit from the expected resolution of the Mutual Agreement Procedure being finalized by the Japanese and Korean income tax authorities for transfer pricing adjustments assessed during prior historical periods. The 647 million yen is the difference between the current projected tax refunds and the estimated amount recorded in prior fiscal year.

Segment information

(i) General information about reportable segments

A reportable segment is a component or an aggregated component of TEL Group. For each of the components, discrete financial information is available and the operating result is regularly reviewed by management to make decisions about resources to be allocated to the segment and assess its performance.

The operation of TEL Group consists of segments by products and services based on business units (BUs), and TEL Group identifies as a reportable segment, "semiconductor production equipment (SPE)" and "flat panel display (FPD) production equipment". Products of the SPE segment consist of coater/developers, etch systems, deposition systems, cleaning systems, wafer probers used in the wafer testing process and other semiconductor production equipment. The SPE segment principally develops, manufactures, sells such products and provide services on them.

Products of the FPD production equipment segment consist of coater/developers, etch/ash systems used in the manufacture of flat panel displays. The FPD production equipment segment principally develops, manufactures, sells such products and provide services on them.

(ii) Net sales and profit or loss in reportable segments

Nine months ended December 31, 2018 (April 1, 2018 to December 31, 2018)

(Millions of yen)

	Reportable Segments		Others *1	Total
	Semiconductor Production Equipment	FPD Production Equipment		
Net sales	877,982	81,066	14,338	973,388

	Adjustments *2	Consolidated *3
Net sales	(14,183)	959,204
Segment profit (loss)	(21,216)	241,700

Notes:

*1. "Others" includes all other operating segments which are not included in the reportable segments, including group-wide logistic services, facility maintenance and insurance.

*2. "Adjustments" for segment loss totaling 21,216 million yen mainly consists of research and development costs of 11,951 million yen pertaining to the fundamental research and element research of TEL and other general and administrative costs that do not belong to reportable segments.

*3. Segment profit (loss) is adjusted against income before income taxes in Consolidated Statements of Income.

(iii) Impairment losses on fixed assets and goodwill, etc. in reportable segments

Significant impairment losses related to fixed assets: None

Significant changes in goodwill amount: None

Significant gains on negative goodwill: None
