1. Business Results

(1) Overview of Operating Results

With respect to the global economy in the first half of the current fiscal year, while concerns about geopolitical risks persist, the economies of Europe and the United States showed signs of stability with the inflation rate at around 2%. In the electronics industry, where the Tokyo Electron (TEL) Group operates, new electronic devices incorporating generative AI have been introduced and new markets are beginning to emerge. In addition, there are signs of recovery in PCs and smartphones, which has improved the supply and demand balance for semiconductor devices and led to an increase in production line utilization rates.

Under these circumstances, in the semiconductor production equipment market during the first half of the current fiscal year, capital investment in memory and advanced packages for generative AI applications grew significantly, while capital investment in mature generation of semiconductors in China continued. In addition, capital investment in cutting-edge logic/foundry semiconductors also exceeded that of the same period last year.

Against the backdrop of the transition to a data society accompanied by the expansion of information and communication technology and efforts toward realizing a decarbonized society, the role of semiconductors in supporting electronic devices and their technological innovation are becoming increasingly important, and the semiconductor production equipment market is expected to grow further in the medium- to long-terms.

As a result, the consolidated financial results (cumulative) for the first half of the current fiscal year were net sales of 1,121,626 million yen (year-on-year growth of 36.9%), operating income of 313,904 million yen (year-on-year growth of 75.8%), ordinary income of 321,181 million yen (year-on-year growth of 77.2%), and net income attributable to owners of parent of 243,903 million yen (year-on-year growth of 77.4%).

The TEL Group has a single segment of "Semiconductor Production Equipment" and therefore information by segment has been omitted.

(2) Overview of Financial Conditions

Current assets at the end of the second quarter of the current fiscal year were 1,710,211 million yen, an increase of 9,759 million yen compared to the end of the previous fiscal year. This was mainly due to an increase of 45,001 million yen in securities, a decrease of 20,683 million yen in inventories, and a decrease of 19,712 million yen in notes and accounts receivable - trade, and contract assets.

Property, plant and equipment increased by 51,854 million yen from the end of the previous fiscal year, to 389,220 million yen.

Intangible assets decreased by 521 million yen from the end of the previous fiscal year, to 31,862 million yen.

Investments and other assets increased by 300 million yen from the end of the previous fiscal year, to 386,560 million yen.

As a result, total assets increased by 61,392 million yen from the end of the previous fiscal year, to 2,517,855 million yen.

Current liabilities increased by 21,235 million yen from the end of the previous fiscal year, to 633,135 million yen. This was largely due to an increase of 13,444 million yen in consumption tax payable, and an increase of 7,935 million yen in customer advances.

Long-term liabilities increased by 1,958 million yen from the end of the previous fiscal year, to 86,341 million yen.

Net assets increased by 38,198 million yen from the end of the previous fiscal year, to 1,798,378 million yen. This was largely due to an increase of 243,903 million yen resulting from recording net income attributable to owners of parent, a decrease resulting from the payment of 113,767 million yen in year-end dividends for the previous fiscal year, a decrease resulting from the purchase of treasury stock of 80,002 million yen, and a decrease of 12,755 million yen in foreign currency translation adjustments. As a result, the equity ratio was 70.8%.

(3) Overview of Cash Flows

Cash and cash equivalents at the end of the second quarter of the current fiscal year increased by 43,060 million yen compared to the end of the previous fiscal year, to 504,669 million yen. The combined balance including 20,909 million yen in time deposits and short-term investments with maturities of more than three months that are not included in cash and cash equivalents was 525,578 million yen, an increase of 53,030 million yen from the end of the previous fiscal year. The overall situation regarding cash flows during the second quarter of the current fiscal year was as described below.

Cash flows from operating activities were positive 332,433 million yen, an increase of 131,811 million yen compared to the same period of the previous fiscal year. The major positive factors were 320,855 million yen in income before income taxes, 27,709 million yen in depreciation and amortization, and a 15,788 million yen decrease in notes and accounts receivable - trade, and contract assets, and the major negative factor was 80,074 million yen in payment of income taxes.

Cash flows from investing activities were negative 91,799 million yen compared to negative 70,354 million yen in the same period of the previous fiscal year. This was largely due to the payment of 77,961 million yen for the purchase of property, plant and equipment.

Cash flows from financing activities were negative 195,092 million yen compared to negative 254,999 million yen in the same period of the previous fiscal year. This was largely due to the payment of 113,767 million yen in dividends, and the payment of 80,002 million yen for the purchase of treasury stock.

(ii) Dividends Forecast Revision

Our dividend policy is to link dividend payments to business performance on an ongoing basis. Our basic policy for returning profits to shareholders is to maintain a payout ratio of around 50% based on consolidated net income attributable to owners of parent. In conjunction with the revision of our consolidated financial forecasts described above, we would like to amend the annual dividends forecast from 519 yen per share as announced on August 8, 2024, to 571 yen per share (Interim dividends : 265 yen, Year-end dividends : 306 yen).

| | Dividends per Share | | |

| Results for the Year Ended March 31, 2024 | 148.00 | 245.00 | 393.00 |

Note: The financial forecasts and estimates stated in this Summary of Consolidated Financial Results are based on certain assumptions judged to be reasonable by the Company in light of information currently available concerning economic conditions in Japan and overseas, fluctuations in foreign exchange rates, and other factors that may have an impact on performance. The Company does not promise that the forecasts or estimates will be accurate.

They are therefore susceptible to the impact of many uncertainties, including market conditions, competition, the launching of new products (and their success or failure), and global conditions in the semiconductor related industry. Consequently, actual sales and profits may differ substantially from the projections described in this Summary of Consolidated Financial Results.

Changes in accounting policies

Accounting Standard for Current Income Taxes

The Company applies "Accounting Standard for Current Income Taxes" (ASBJ Statement No. 27, October 28, 2022), etc from the beginning of the first quarter of the current fiscal year.

The amendment of classification of income taxes (taxation on other comprehensive income) follows the transitional treatment prescribed in the proviso of paragraph 20-3 of "Accounting Standard for Current Income Taxes" and the proviso of paragraph 65-2 (2) of "Guidance on Accounting Standard for Tax Effect Accounting" (ASBJ Guidance No. 28, October 28, 2022). There is no effect by this change on the quarterly consolidated financial statements.

Regarding the amendment related to the revision of the treatment on the consolidated financial statements for profits and losses on the sale of shares of subsidiaries and affiliates between consolidated companies that are deferred for tax purposes, the Company applies "Guidance on Accounting Standard for Tax Effect Accounting" from the beginning of the first quarter of the current fiscal year. This change has been applied retrospectively and the quarterly consolidated financial statements and the consolidated financial statements for the previous fiscal year are after the retrospective application. There is no effect by this change on the quarterly consolidated financial statements and the consolidated financial statements for the previous fiscal year.
